

ECG Cables and Lead Wires

Curbell offers hundreds of ECG cable and lead configurations compatible with all major manufacturers. If we don't have a match on hand, we can have it custom designed for you.

Our cables meet ANSI/AAMI requirements, and are not mass-produced or lot-sampled. Each one is assembled by hand and individually inspected to ensure the highest level of quality possible. Plus, our ECG cable and lead wire products are designed to be used interchangeably with most original equipment.

- ▶ Compatible with all major manufacturers including GE®/Marquette®, Philips®/HP®, Spacelabs® and Datex Ohmeda®
- ▶ One-piece, machined contacts — there are no rolled or crimped pins that can deform over time or bend easily
- ▶ Direct replacements for Twin Pin, Multi-Link®, Tru-Link®, VS/VR, and 300 Series systems
- ▶ Snap, grabber, and Sure-Lock® connections available
- ▶ Two year warranty on all trunk cables, one year warranty on all lead wires
- ▶ Fully molded for durability
- ▶ Custom designs available

Many styles of cables and lead wires are available
