

PILLOW SPEAKER BREAKAWAY CABLES

REDUCE REPAIR COSTS

Pillow speakers need to hold up to the rigors of constant use by patients. To help reduce plug and patient station damage from excessive pulling, simply add a low cost Pillow Speaker Breakaway Cable which protects both by breaking apart cleanly when pulled in any direction.

- ▶ Designed to reduce the need for repair, not just make frequent cable replacements faster
- ▶ A small investment that can pay for itself in less than the cost of a single pillow speaker or patient station repair

Breakaway cables are available for most nurse call systems, including Hillrom COMposer and NaviCare (pictured here)
See the reverse side for a full listing.

PILLOW SPEAKER BREAKAWAY CABLES
